A multilayered approach

Stryke Services

At Stryke, we've aligned and built our Cybersecurity and Compliance services around the trusted **NIST CSF 2.0 framework**. This ensures that our services not only meet industry standards but also provide robust, scalable protection against evolving cyber threats. With NIST CSF 2.0 as our foundation, you can trust us to deliver unparalleled security, regulatory compliance, and peace of mind for your business.
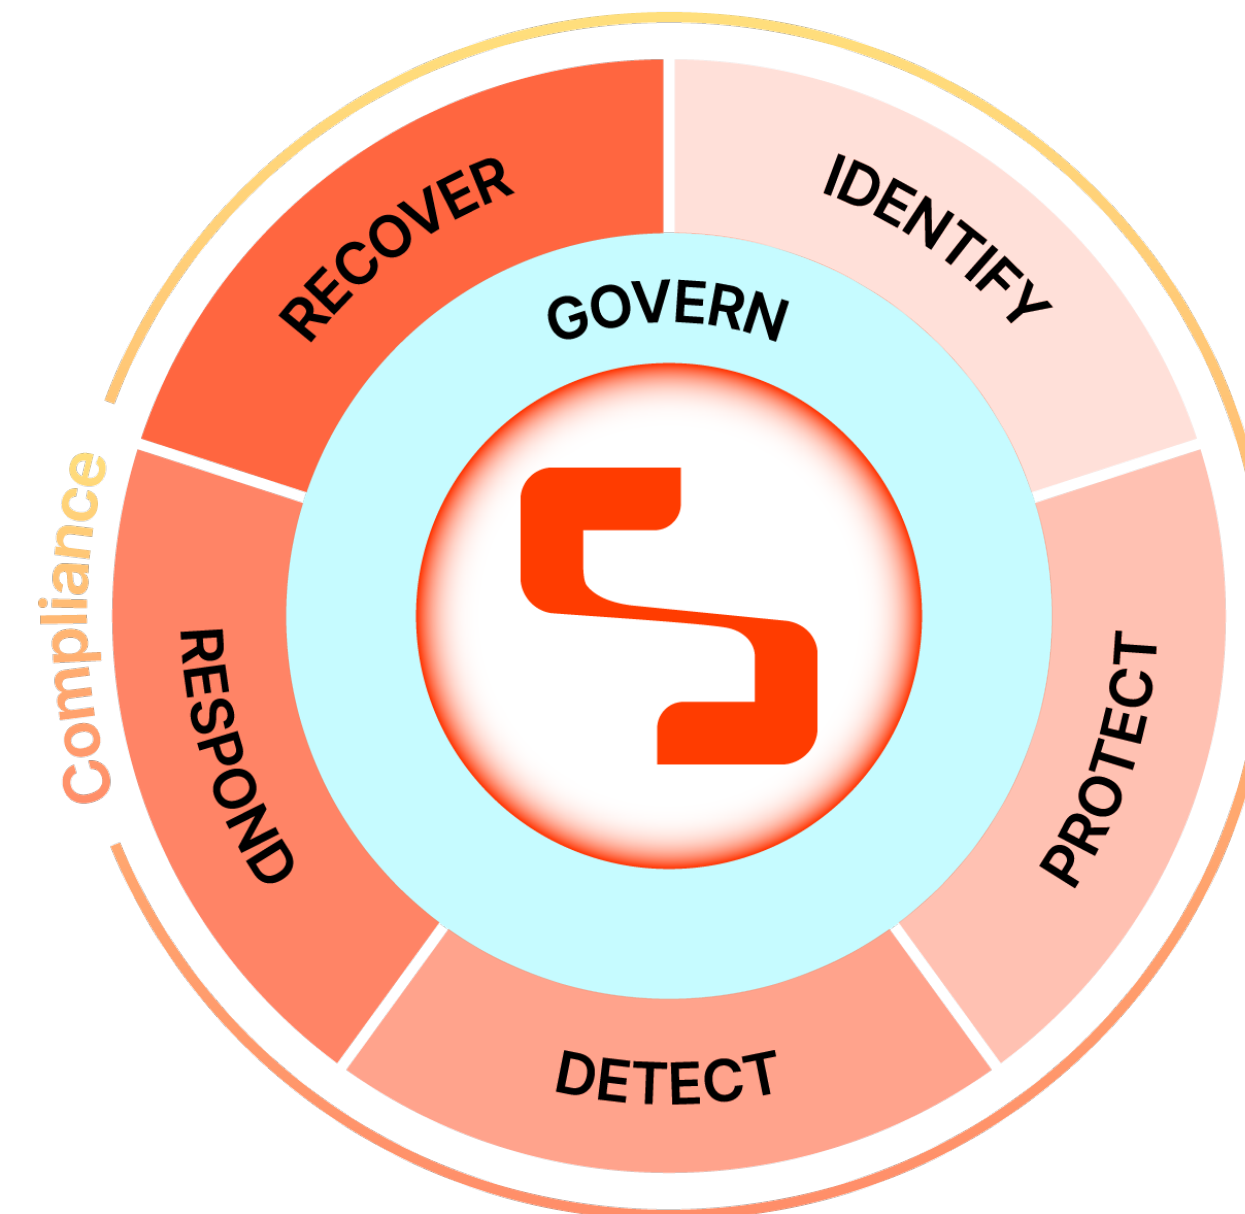

Compliance

Stryke Comply – Simplifying ISO 27001 Compliance with Automated Efficiency

Achieve ISO 27001 certification with ease through our expert-led, automated compliance solution.
We are an official Managed Security Service Provider of Drata, a market leader in compliance automation.

We handle every step of your compliance journey...

▷ From seamless Drata installation to ongoing automation that covers up to 80% of the workload, we reduce the complexity and effort involved in managing ISO 27001 standards.

▷ Our team of seasoned ISO experts ensures your business remains secure, compliant, and audit-ready, allowing you to focus on growth while we handle the compliance heavy-lifting.

It's time to Stryke
Unifying Cybersecurity and Compliance
LET'S TALK

Compliance for every kind of business

Startup
New to compliance but don't know where to start? From SOC 2 to ISO 27001, we'll distil the jargon to get you up to speed and ensure your business is compliant.

Scale
Don't let compliance get in the way of growing your business. Win business based on trust and scale compliance when you need it.

Specialised
Have an existing governance, risk and compliance program but need to boost it with automation and streamlined workflows?

Our approach

We're experts in Cybersecurity and Compliance, the two are interlinked. We have a unified approach and focus on these 5 pillars:

Integration with existing tools
Integrate with over 140 SaaS tool and platforms to ensure that compliance processes are seamlessly incorporated into existing workflows.

Automated monitoring and evidence collection
Automatically collect evidence needed for auditing and monitor security controls in real-time to ensure all necessary controls are active and functioning correctly.

Streamlined risk Management
We develop and track risk treatment plans, ensuring that all identified risks are appropriately addressed and mitigated.

Policy management
Help ensure all employees adhere to established security policies by tracking policy acceptance and enforce compliance across your business. Assisted by pre-built templates for required security policies customised to fit the specific needs of your business.

Smarter audits and reporting
Ensure you are audit ready and never misplace crucial evidence, and share documentation instantly in real time with your auditor.

It's time to Stryke

We take a multi-layered approach to protect, defend and support your business against cyber-attacks. Let's discuss how we can secure your business.

LET'S TALK

Complimentary Dark Web Scan

Discover threats – secure your digital presence

Protect your businesses data with our free Dark Web Scan. Harnessing the power of advanced technology, we delve into the corners of the internet to detect potential threats and breaches.
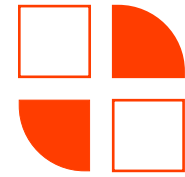

Dark Web Scan

Stryke offers a free Dark Web Scan that searches the hidden corners of the internet for potential data breaches or threats to your business, such as leaked credentials and employee info.

Advanced Scanners

Our scanners are designed to thoroughly analyse the dark web using industry-specific algorithms, providing actionable insights to prevent future attacks.

Centralised Platform

Stryke provides an intuitive dashboard to help businesses manage and analyse all threat data in one place, allowing for easy interpretation and proactive response.
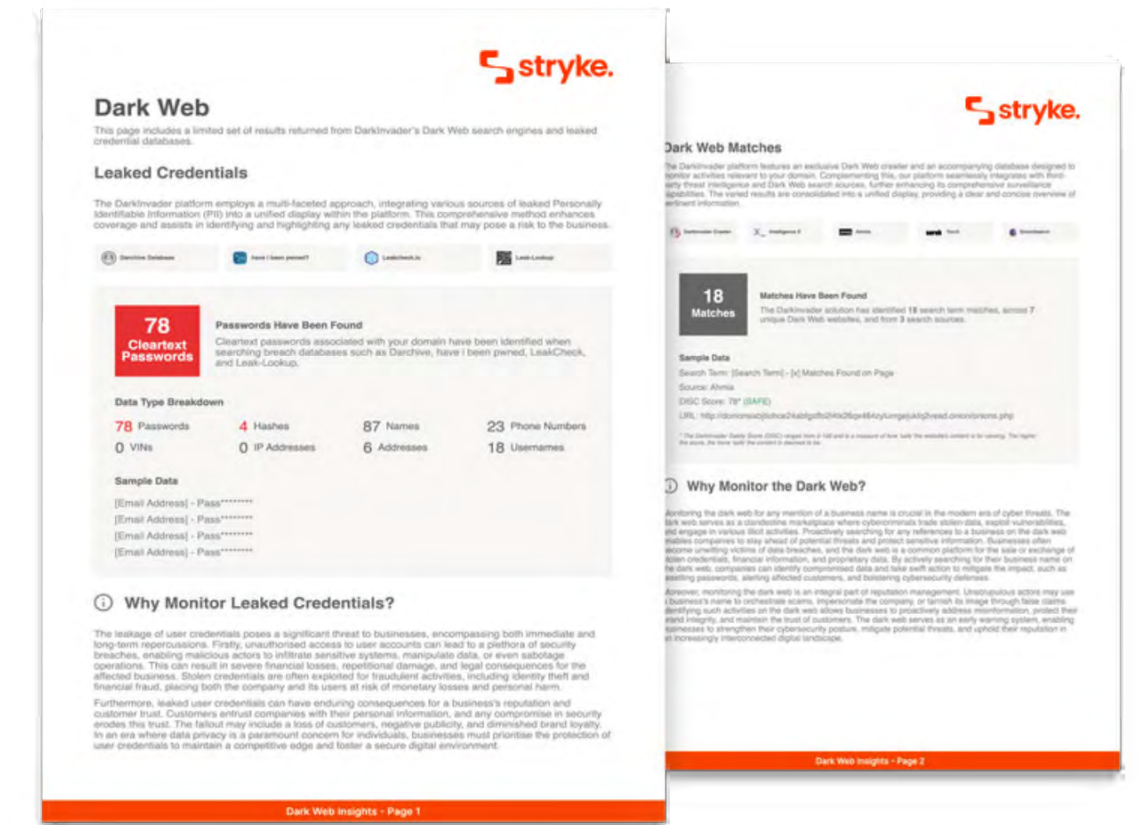

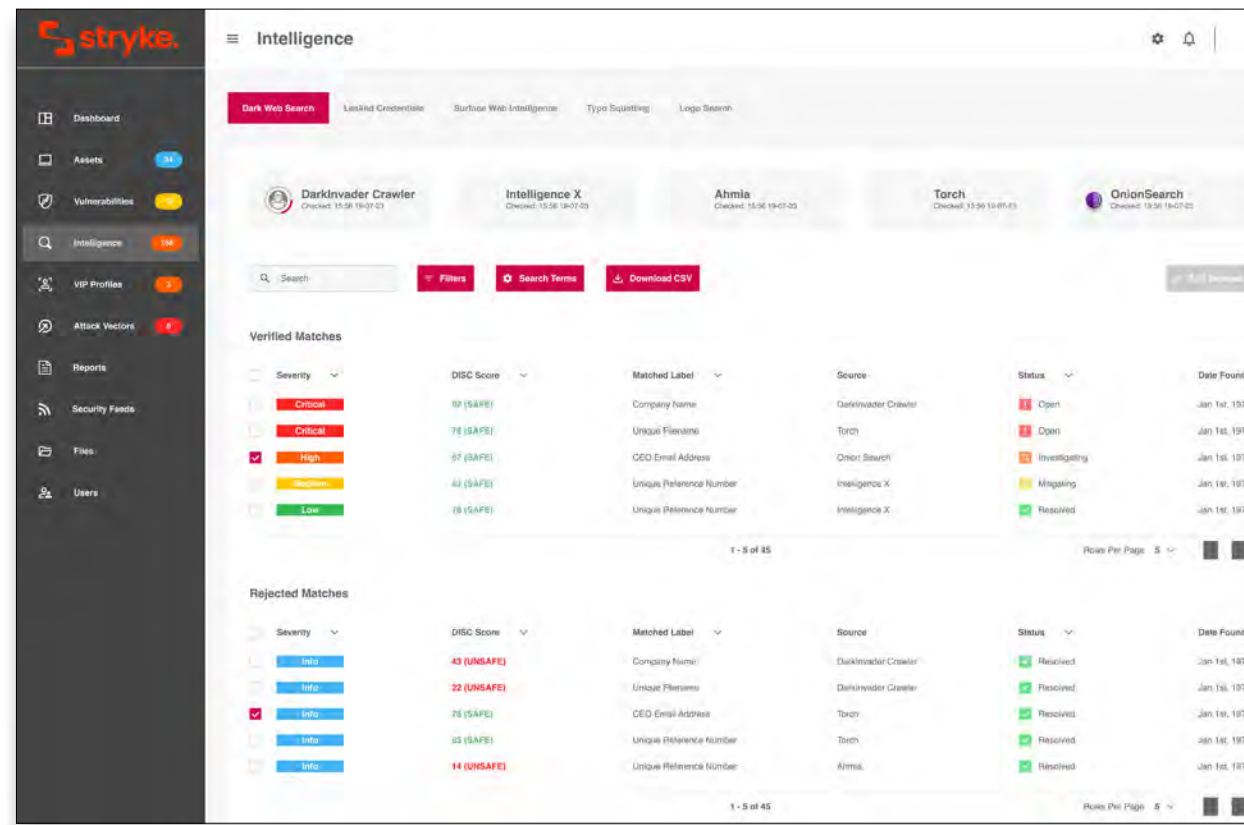

A Dark Web Scan is an essential component of your business's cybersecurity strategy. It identifies potential threats and security breaches, enabling you to implement preventative measures effectively. The dark web is a breeding ground for corporate espionage and data theft, making a Dark Web Scan crucial for maintaining the integrity of your business's sensitive information.

Want to see what we can find for yourself?

Get your Dark Web Scan – fill out the form and we'll get your report over to you. It's as simple as that! Plus you'll get access to a free account with 14 days of access!
